ABOUT US

Check out **BW SKATEBOARDING** for our Skateboards and Accessoires

Bicycle World is a full service bicycle shop located in **Windsor, Ontario**. The city and surrounding area enjoys large and dedicated groups of both recreational and competitive mountain bikers and road riders. There's also a strong BMX scene and the city has produced some of the best flat land riders in the world!

Family owned and operated, Bicycle World has earned a reputation for providing only the highest level of quality service. Bicycle lines are carefully chosen to not only provide variety but only the best quality, best value bicycles on the market. We carry a wide variety of parts and accessories. Don't forget, we also carry a large selection of skateboards and accessories.

BRANDS AT BICYCLE WORLD

You can check out the best brands in the world

Specialized Bicycles is a major American brand of bicycles and related products. It was founded in 1974 by Mike Sinyard. Many riders use Specialized Bicycles in the North American and European professional cycling circuits

The company was founded in 1978 by Bob Haro, who began by producing number plates for BMX bikes in his home. Demand for the plates quickly outgrew his one-man capacity and as the company grew, Haro helped develop the sport of freestyle BMX

KHS has been producing high quality bicycles for cyclists in all parts of the world since 1974. From our first day in business, KHS has always delivered a unique blend of styling, performance and excellent consumer value

Santa Cruz Bicycles was founded in 1993 in the Seabright Cannery, in Santa Cruz California. Their first bike, the Tazmon, was a single pivot dual suspension bike that rattled established sensibilities and helped define our then- ethos of "simply advanced"

Norco Bicycles from British Columbia, Canada has grown into a global company delivering superior cycling experiences to everyone, everywhere. With nearly 50 years as a leader in the industry, our success is built on an unwavering commitment to listen, innovate and ride

OUR SERVICES

We can perform any repair that you may require. We can also handle requests for parts that require factory service

TUNE UP

The bicycle is inspected from front to back, and every nut/bolt is checked. All adjustments are made including brakes, gears, wheel/headset/bottom bracket bearings, wheel trueness and others as required. The drivetrain is cleaned and lubed and the bicycle test ridden to make sure every component performs as it should.

SERVICES

Bicycle World is widely recognized as providing only the best quality of service, a reputation we're proud of and work hard to maintain. From flat tires to tune ups to wheel building and fork overhauls, we do it all and do it right, the first time.

OVERHAUL

The bicycle is stripped down to the frame and every component is completely de-greased/cleaned. All serviceable bearings are cleaned and lubed. The bicycle is re-assembled and a tune up is completed as described above

WHEEL BUILDING

Wheels are laced, tensioned, dished, stressed and trued all with your choice of hub, rim, spokes and lacing pattern.

FORK OVERHAUL

Suspension forks are stripped down, cleaned and re-assembled with new seals where applicable. If required new oil is added, lock-out systems bled and all adjustments and seals are tested. Lastly the fork is adjusted to it's pre-overhaul settings

WHEEL TRUING

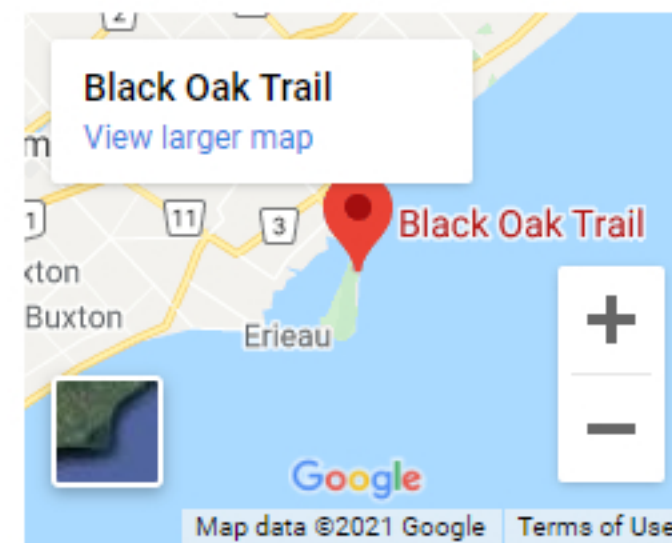

Bicycle wheels are checked for straightness, roundness and dish and repaired as required

LOCAL TRAILS

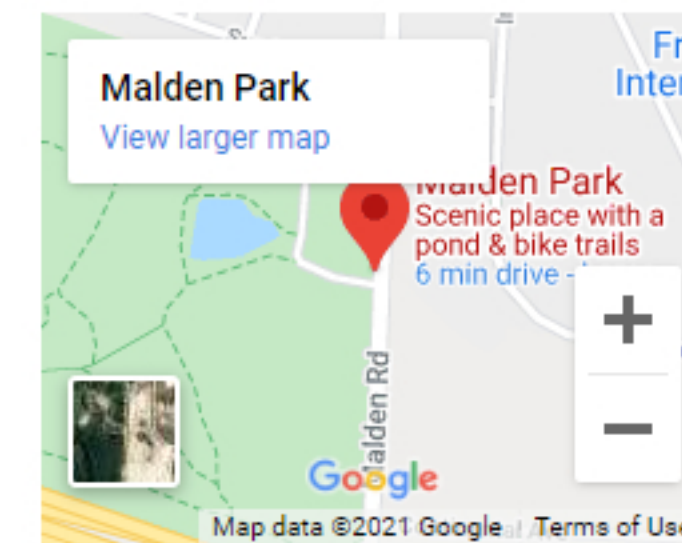

There are many great trails in the Windsor Area. Click on the trail names to download the PDF maps so that you don't get lost.
